**Bourse d'excellence de recherche en neurosciences Didier-Mouginot**

Dear Didier-Mouginot scholarship donor,

I'm honored to be this year's recipient of the Bourse d'excellence de recherche en neurosciences Didier-Mouginot. I moved from Iran to Quebec City last summer to pursue my dream of becoming a neuroscientist as a Ph.D. student. Being an electrophysiologist in training in the laboratory of Dr. Frederic Bretzner, I am deeply honored to receive this prestigious award named after Dr. Didier Mouginot an inspiring electrophysiologist who has studied the electrical properties of neurons involved in sodium sensing in the brain during his career at Laval University. For me, it will be a big motivation for trying my best to become an honorable neuroscientist as Didier-Mouginot was and to use my skills and knowledge to serve the neuroscience community in the future. Thanks again for your generous donation and your investment in my training in neuroscience.

Sincerely yours

Narges Karimi  
Doctorat en neurosciences
